WHAT'S NEXT • BUILD PREREQS

Five things to lock before engineering.

1 Voice transcription latency

Target < 4s for a 60s clip. Whisper Large via background queue, optimistic UI on submit.

2 Cluster threshold

New cluster auto-forms after 5 similar takes. Below threshold, the take joins nearest cluster.

3 Moderation

Auto-flag for slur / harassment. Human-in-loop for clusters that grow > 50 takes.

4 Identity reveal

Anonymous-by-default. One-tap "reveal myself" before posting; can't un-reveal later.

5 Closed-topic state
